- **Prepare a document with details of the following along with their price**

- *Power BI Desktop*

Power BI Desktop is a free application you install on your local computer that lets you connect to, transform, and visualize your data. With Power BI Desktop, you can connect to multiple different sources of data, and combine them (often called modeling) into a data model. This data model lets you build visuals, and collections of visuals you can share as reports, with other people inside your organization. Most users who work on business intelligence projects use Power BI Desktop to create reports, and then use the *Power BI service* to share their reports with others.

COST: Free

- *Power BI Pro*

Power BI Pro is an individual user license that lets users read and interact with reports and dashboards that others have published to the Power BI service. Users with this license type can share content and collaborate with other Power BI Pro users. Only Power BI Pro users can publish or share content with other users or consume content that's created by others, unless a Power BI Premium capacity hosts that content.

COST: $9.99 per user/month

- *Power BI Premium*

Power BI Premium is a capacity-based offering that includes:

- Flexibility to publish reports broadly across an enterprise, without requiring recipients to be licensed individually per user.
- Greater scale and performance than shared capacity in the Power BI service.
- The ability to maintain BI assets on-premises with Power BI Report Server.
- One API surface, a consistent set of capabilities, and access to the latest features for embedded analytics.

Power BI Premium consists of capacity in the Power BI service exclusively allocated to each organization. The capacity is supported by dedicated hardware fully managed by Microsoft. Organizations can choose to apply their dedicated capacity broadly, or allocate it to assigned workspaces based on the number of users, workload needs, or other factors—and scale up or down as requirements change.

COST: $4,995 Monthly price per dedicated cloud compute and storage resource with annual subscription
